Name: _____ Date: _____

▣ READ — READ THIS PASSAGE CAREFULLY. YOU MAY READ IT TWICE.

Wildlife rescue centers help injured and sick animals every day. These special facilities follow an organized system to care for animals in need. First, rescuers find animals that are hurt or lost and bring them to the center. Next, veterinarians examine each animal carefully to understand what problems they have. The medical team then provides treatment, which might include medicine, surgery, or special care. Animals stay at the center while they heal and grow stronger. Finally, when animals are healthy and ready, rescuers release them back into the wild where they belong. This step-by-step process ensures that each animal receives proper attention. Rescue workers must be patient and skilled because different animals need different types of help. A baby deer needs other care than an injured hawk. Thanks to animal rescue centers, thousands of creatures get a second chance at life every year.

Wildlife rescue centers help injured and sick animals every day. These special facilities follow an organized system to care for animals in need. First, rescuers find animals that are hurt or lost and bring them to the center. Next, veterinarians examine each animal carefully to understand what problems they have. The medical team then provides treatment, which might include medicine, surgery, or special care. Animals stay at the center while they heal and grow stronger. Finally, when animals are healthy and ready, rescuers release them back into the wild where they belong. This step-by-step process ensures that each animal receives proper attention. Rescue workers must be patient and skilled because different animals need different types of help. A baby deer needs other care than an injured hawk. Thanks to animal rescue centers, thousands of creatures get a second chance at life every year.

MAIN IDEA

1. What is this passage mostly about?

The passage is mostly about how wildlife rescue centers help injured animals using an organized system of care and treatment.

TEXT EVIDENCE

2. According to the passage, what are the first two steps that rescuers take to help animals?

The first step is finding animals that are hurt or lost and bringing them to the center. The second step is having veterinarians examine each animal carefully to understand their problems.

VOCABULARY

3. What does the word 'veterinarians' mean in the passage?

Veterinarians are doctors who treat sick and injured animals.

INFERENCE

4. Why do you think rescue workers need to be patient when helping animals?

Different animals need different types of care, and healing takes time, so workers must work carefully and calmly with each animal.

CAUSE AND EFFECT

5. What happens as a result of the organized rescue process described in the passage?

As a result, thousands of creatures get a second chance at life every year and can be released back into the wild.

TEXT EVIDENCE

6. What is the final step in the rescue center's system, and why is it important?

The final step is releasing healthy animals back into the wild where they belong, which is important because it returns them to their natural homes.
