VOCABULARY

SYMMETRY — when two sides are exactly the same shape and size

BALANCE — having equal weight or parts on both sides

MIRROR — a line that divides a shape into two matching halves

REFLECT — to flip an image across a line of symmetry

CONGRUENT — having the same shape and size

IDENTICAL — exactly the same in every way

FLIPLINE — the line where a shape folds to match perfectly

MATCHING — parts that are the same on both sides

GEOMETRY — the math of shapes and their properties

VISUAL — something you can see or observe
