## VOCABULARY

**VOLUME** — The amount of space inside a 3D shape, measured in cubic units

**CUBIC** — Related to cubes; a unit of volume measurement like cubic inches

**UNIT** — A standard measurement used to measure length, width, or capacity

**CAPACITY** — The maximum amount a container can hold

**MEASURE** — To find the size or amount of something using standard units

**CONTAINER** — A box or object that holds items or liquids

**DIMENSION** — A measurable extent of an object like length, width, or height

**LENGTH** — How long something is; one dimension of a 3D shape

**WIDTH** — How wide something is; one dimension of a 3D shape

**HEIGHT** — How tall something is; one dimension of a 3D shape

**SPACE** — The area or room inside a container or shape

**MULTIPLY** — To find volume by multiplying length times width times height
