VOCABULARY

VARIABLE — A letter or symbol representing an unknown number in an equation

EQUATION — A mathematical statement showing two equal expressions

SOLUTION — The value that makes an equation true

COEFFICIENT — The number multiplied by a variable

ISOLATE — To get a variable alone on one side of an equation

INVERSE — The opposite operation used to solve an equation

BALANCE — Keeping both sides of an equation equal

EXPRESSION — A mathematical phrase with numbers, variables, and operations

OPERATION — Addition, subtraction, multiplication, or division

EVALUATE — To find the value of an expression

UNKNOWN — A value we need to find in an equation

EQUALITY — The state of being equal on both sides
