VOCABULARY

VARIABLE — a letter that represents an unknown number

EXPONENT — a number showing how many times to multiply a base

EVALUATE — to find the value of an expression

OPERATION — a mathematical action like addition or subtraction

SIMPLIFY — to make an expression shorter and easier

EQUATION — a statement showing two equal expressions

COEFFICIENT — the number multiplied by a variable

TERM — a single number or variable in an expression

EXPRESSION — a combination of numbers, variables, and operations

FACTOR — a number that divides evenly into another number

PRODUCT — the result of multiplying two numbers

QUOTIENT — the result of dividing one number by another
