VOCABULARY

RATIO — A comparison of two quantities using division

QUANTITY — An amount or number of something

COMPARISON — Looking at how two things relate to each other

RELATIONSHIP — How two quantities connect or depend on each other

PAIR — Two things grouped together

UNIT — A single measurement or standard amount

SCALE — A ratio that shows how one measurement relates to another

PROPORTION — An equation stating that two ratios are equal

RATE — A ratio comparing two different types of quantities

PART — A piece of a whole amount

WHOLE — The complete or total amount

EQUIVALENT — Equal in value or having the same ratio
