VOCABULARY

PLANET — A large object that orbits a star

STAR — A massive ball of hot gas that gives off light

MOON — An object that orbits a planet

EARTH — The planet we live on

ORBIT — The path an object takes around another object

SUN — The star at the center of our solar system

GALAXY — A large group of stars and planets

SOLAR — Related to the sun

ASTEROID — A small rocky object in space

COMET — An icy object with a tail that orbits the sun

GRAVITY — The force that pulls objects toward each other

ROTATION — The spinning motion of an object
